Software Development Engineer in Test

Highly analytical and technically savvy professional with history of success leading and overseeing multifaceted software automation and manual testing of web-based applications within high-growth organisations.

Demonstrated expertise to formulate and implement innovative solutions to effect dramatic improvements in client's services, computer-based training programme, and business processes toward the successful attainment of organisational goals. Well-versed in manual/automating testing, software test case development, and company competency lead in test case creation and execution of large and complex software projects by using agile, scrum, and waterfall methodologies. Notable success in executing projects involving architecture and software development, implementation, testing, and deployment. Skilled trouble-shooter continually focused on identifying, isolating, and resolving technical issues. Proficient in Application Programming Interface (API), Postman/Representational State Transfer (REST) assured library, DDT, OOP, IDE, POM, SDLC, CI and STLC. Articulate communicator fluently speaks the language of both people/technology and blending technical expertise with interpersonal skills, while interacting all levels of management and stakeholders.

Strategic Planning & Analysis / Software Development Lifecycle / Test Management / Agile, Waterfall, & Scrum Methodologies / IT Tools & Technologies / Quality Assurance / Risk Assessment & Mitigation / Complex Problem Resolution / Defect Lifecycle / Test Cases & scenarios / / Relationship Management

TECHNICAL PROFICIENCIES

Operating System:	Windows, Mac OS
Tools & Technologies:	Selenium,Selenium WebDriver, Cypress, Appium, API, Maven, JUnit, TestNG, Cucumber, Jenkins, Postman, REST Assured, JDB, AWS, Eclipse, IntelliJ IDEA, Sublime, Git, GitHub, Jira
Programming Languages:	Java, Python, JavaScript, HTML, CSS, Gherkin, XML

PROFESSIONAL EXPERIENCE

Automation Test Engineer (07/2021 – Present) Teba Tech   **Full time-Istanbul**

I created test cases and test plans for the finance,crm and bpm services of the application RedCase. I created test scripts in Selenium and Java. I created cucumber framework from scratch and used the Gherkin language for scenarios. Stored tests in Azure and executed tests in Jenkins.

Automation Test Engineer (11/2020 – 05/2021) CSM Bank   **USA -Remote**

Created automation testing framework from scratch by utilizing TestNg, Selenium Webdriver and Cucumber with Java programming language. Oversee day-to-day operations by analysing system requirements, design development, and test plans/cases for manual/automation testing, while managing regression, smoke, and functional, positive/negative testing through automating testing on different application functionalities. Formulate and implement effective locator strategy for XPath and CSS to run Selenium script in reliable condition. Discuss current software issues and re-test defects by collaborating with developers. Use Jira for reporting/tracking defects and maintaining Java, Selenium Automation codes, and resources in Version Control System Git.

Automation Test Engineer (09/2014 – 06/2018) Red Atlantic   **Full Time- Istanbul**

Created test plans, test cases. Executed automation tests using Selenium Webdriver with TestNG and Java.

Key Achievements:

▪ Devised and applied Data Driven Testing and Page Object Model based Automation framework through utilisation of Java, Selenium WebDriver, TestNG, Maven, and Java.

 ▪ Authorise Pop-ups, Browser navigations, and Mouse Movements through development of test case by utilising Selenium WebDriver.

▪ Test the website on various browsers, including Chrome/Firefox by working on cross browser testing through Selenium WebDriver.

Web Developer (08/2011 – 05/2013) Fulton Science Academy USA-Georgia

Website content development and design, dynamic Website development and implementation. Designing the website on a framework by using template web tools and pages. Basic HTML structures, bootstrap and CSS blocks.

Key Achievements:

- Used HTML, CSS, bootstrap to develop the website of the company.

- Web site content generating by using professional designing tools and programmes.

IT Specialist (09/2005– 04/2008)   Bektasoglu Insaat, Jordan

Solving IT problems of the work campus. Technical support for employers and solving network problems.

Key Achievements:

- Network installation detecting technical network problems.

- Analysing and producing solutions for IT problems.

IT Support Specialist (2002)   Maestro Software, Istanbul

Designing website of the company.

Key Achievements:

- Implement HTML codes for building the website.

IT Support Specialist (1999 Internship Program)   Yanki Bilgi Merkezi, Istanbul

Giving technical support to the customers.

Key Achievements:

- Designing website of the company.

- Developing customer relationship software programmes

- Installation of network systems

EDUCATION AND TRAINING

QA Tester Course
TechProed ,USA (Remote)

Master of Business Administration: MBA English preparation program
Yeditepe University, Istanbul, Turkey

Bachelor's Degree: Mathematical Engineering Department
Yildiz Technical University, Istanbul, Turkey

LANGUAGES

English: Advanced

Turkish: native
